Thin Solid Films 316 (1998) 196–199

thin solid films

Subject Index of Volume 316

a-Si:H
An ab-initio molecular-orbital analysis on the initial plasma CDV process of a-Si:H film on glass substrate, 134
ab initio molecular orbital method
An ab-initio molecular-orbital analysis on the initial plasma CDV process of a-Si:H film on glass substrate, 134
Adhesion
Plasma modification of the inner surface of a rubber hose, 165
Adsorbed CO
Diamond deposition procedure from microwave plasmas using a mixture of CO_2–CH_4 as carbon source, 18
Aluminum nitride
Control of preferential orientation of AlN films prepared by the reactive sputtering method, 152
Preparation of AlN fine powder by thermal plasma processing, 189
Aluminum
Correlations between electrode phenomena and coating properties in wire arc spraying, 169
Amorphous carbon
XPS structural characterization of hydrogenated amorphous carbon thin films prepared by shielded arc ion plating, 45
Anodic oxidation of aluminum
A novel low temperature plasma generator with alumina coated electrode for open air material processing, 65
Arc ion plating
XPS structural characterization of hydrogenated amorphous carbon thin films prepared by shielded arc ion plating, 45
Arc plasma
Concurrent preparation of carbon, boron nitride and composite nanotubes of carbon with boron nitride by a plasma evaporation method, 178
Arc spray
Correlations between electrode phenomena and coating properties in wire arc spraying, 169
Arc-discharge plasma
High yield production of C_{74} using an arc-discharge plasma, 51
Argon gas flow
Generation of non-equilibrium plasma at atmospheric pressure and application for chemical process, 117
Argon plasma arc
Evaporation from synthetic incinerator ashes melted by plasma arc, 105
Atmospheric pressure cold plasma
A novel low temperature plasma generator with alumina coated electrode for open air material processing, 65
Atmospheric pressure glow plasma
Development of silica coating methods for powdered pigments with atmospheric pressure glow plasma, 89
Atmospheric pressure non-equilibrium plasma
Generation of non-equilibrium plasma at atmospheric pressure and application for chemical process, 117
Atomic processes
Formation and destruction processes of negative ions in a bounded plasma, 128
Barrier
Plasma modification of the inner surface of a rubber hose, 165
Bias sputter deposition
Microstructure and nanomechanical properties of cubic boron nitride films prepared by bias sputter deposition, 35
Boron nitride
Concurrent preparation of carbon, boron nitride and composite nanotubes of carbon with boron nitride by a plasma evaporation method, 178
Borosilicate glass
An ab-initio molecular-orbital analysis on the initial plasma CDV process of a-Si:H film on glass substrate, 134
Bounded hydrogen plasma
Formation and destruction processes of negative ions in a bounded plasma, 128

CF_4 plasma etching
Polyimide transmitted E-beam excited CF_4 plasma etching, 13
CO_2–CH_4 gas mixture
Diamond deposition procedure from microwave plasmas using a mixture of CO_2–CH_4 as carbon source, 18
Carbon
Concurrent preparation of carbon, boron nitride and composite nanotubes of carbon with boron nitride by a plasma evaporation method, 178
Cementite film
Characterization of cementite films prepared by electron-shower-assisted PVD method, 100
Chamber wall cleaning
Chamber wall cleaning in a reactive ECR plasma, 148
Charging damage
Power dependence of gate oxide damage from electron shading effect in high-density-plasma metal etching, 1
Chemical amplification negative E-beam resist
Polyimide transmitted E-beam excited CF_4 plasma etching, 13
Chlorophenols
Plasma induced degradation of chlorophenols in an aqueous solution, 123
Coating
Correlations between electrode phenomena and coating properties in wire arc spraying, 169
Computer simulation
Plasma-induced free radicals of polycrystalline dicarbohydrates studied by electron spin resonance, 158
Cube corner diamond tip
Microstructure and nanomechanical properties of cubic boron nitride films prepared by bias sputter deposition, 35
Cubic boron nitride
Microstructure and nanomechanical properties of cubic boron nitride films prepared by bias sputter deposition, 35

Elsevier Science S.A.
PII S0040-6090(98)00557-4

Degradation
Plasma induced degradation of chlorophenols in an aqueous solution, 123
Diamond deposition
Diamond deposition procedure from microwave plasmas using a mixture of CO_2–CH_4 as carbon source, 18
Diamond like carbon
Optical emission study of the laser plasma plume produced during diamondlike carbon thin film preparation, 40
Diamond
Diamond deposition on titanium and iron substrates pretreated in N_2–C_2H_2 plasma, 29
Dicarbohydrates
Plasma-induced free radicals of polycrystalline dicarbohydrates studied by electron spin resonance, 158
Dimer
Control of preferential orientation of AlN films prepared by the reactive sputtering method, 152
Droplet shield
TiN/Ti film formation by vacuum arc deposition with droplet shield plate, 73

Electrode
Correlations between electrode phenomena and coating properties in wire arc spraying, 169
Electrode
Ar torch plasma characteristics and its application to waste treatment, 111
Electron cyclotron resonance (ECR) plasma
Chamber wall cleaning in a reactive ECR plasma, 148
Electron shading
Power dependence of gate oxide damage from electron shading effect in high-density-plasma metal etching, 1
Electron spin resonance
Plasma-induced free radicals of polycrystalline dicarbohydrates studied by electron spin resonance, 158
Electron-shower-assisted PVD
Characterization of cementite films prepared by electron-shower-assisted PVD method, 100
End plate
Effects of antenna wavenumber spectrum and metal end plate on plasma characteristics excited by helicon wave, 139
Epitaxial growth
Total low temperature plasma process for epitaxial growth of compound semiconductors on Si: InSb/Si, 93
Evaporation
Evaporation from synthetic incinerator ashes melted by plasma arc, 105

Fifty-nanometer lines and spaces pattern
Polyimide transmitted E-beam excited CF_4 plasma etching, 13
Film characterization
TiN/Ti film formation by vacuum arc deposition with droplet shield plate, 73
Flow-rate
Ar torch plasma characteristics and its application to waste treatment, 111
Fragmentation pattern
Mass spectroscopy in plasma-enhanced chemical vapor deposition of silicon-oxide films using tetramethoxysilane, 79
Fullerene C_{74}
High yield production of C_{74} using an arc-discharge plasma, 51

Gradient composite
Preparation of Ti–Al gradient composite films by sputtering, 68

Helicon wave
Effects of antenna wavenumber spectrum and metal end plate on plasma characteristics excited by helicon wave, 139
Helium plasma
A novel low temperature plasma generator with alumina coated electrode for open air material processing, 65
High-density plasma
Power dependence of gate oxide damage from electron shading effect in high-density-plasma metal etching, 1
High-rate deposition
High-rate deposition of $LiNbO_3$ films by thermal plasma spray CVD, 185
High-yield production
High yield production of C_{74} using an arc-discharge plasma, 51
Hydrogen negative ions
Formation and destruction processes of negative ions in a bounded plasma, 128
Hydrogen-bonding network
Plasma-induced free radicals of polycrystalline dicarbohydrates studied by electron spin resonance, 158

InSb
Total low temperature plasma process for epitaxial growth of compound semiconductors on Si: InSb/Si, 93
Induced radio-frequency (RF) surface voltage
Chamber wall cleaning in a reactive ECR plasma, 148
Induction plasma process
In-flight nitriding of the $MoSi_2$ powders in an Ar–N_2 induction plasma, 174
Inductively coupled plasma
Positive bias effects on the growth of diamond at pressures below 100 mTorr, 24
Effects of antenna wavenumber spectrum and metal end plate on plasma characteristics excited by helicon wave, 139
Initial growth
An ab-initio molecular-orbital analysis on the initial plasma CDV process of a-Si:H film on glass substrate, 134
Ion bombardment
Positive bias effects on the growth of diamond at pressures below 100 mTorr, 24

Large diameter plasma
Production of 1-m size uniform plasma by modified magnetron-typed RF discharge with a subsidiary electrode for resonance, 60
Laser plasma plume
Optical emission study of the laser plasma plume produced during diamondlike carbon thin film preparation, 40
Laser scattering spectroscopy
Spectroscopic study of the $YbaCuO_{7-x}$ ablation plasma plume: crossover from the blast to the "drag" regime, 56
$LiNbO_3$ films
High-rate deposition of $LiNbO_3$ films by thermal plasma spray CVD, 185
Low pressure diamond deposition
Positive bias effects on the growth of diamond at pressures below 100 mTorr, 24

Mach–Zehnder interferometry
Spectroscopic study of the $YbaCuO_{7-x}$ ablation plasma plume: crossover from the blast to the "drag" regime, 56
Magnetron plasma
SiO_2 etching characteristics in DC magnetron plasmas by using an external magnetic field, 6

Mass spectroscopy
Mass spectroscopy in plasma-enhanced chemical vapor deposition of silicon-oxide films using tetramethoxysilane, 79
Microwave heating
Generation of non-equilibrium plasma at atmospheric pressure and application for chemical process, 117
Microwave plasma
Diamond deposition procedure from microwave plasmas using a mixture of CO_2–CH_4 as carbon source, 18
Molecular processes
Formation and destruction processes of negative ions in a bounded plasma, 128
Molybdenum disilicide
In-flight nitriding of the $MoSi_2$ powders in an Ar–N_2 induction plasma, 174

Nanoindentation
Microstructure and nanomechanical properties of cubic boron nitride films prepared by bias sputter deposition, 35
Nanotubes
Concurrent preparation of carbon, boron nitride and composite nanotubes of carbon with boron nitride by a plasma evaporation method, 178
Nitridation
In-flight nitriding of the $MoSi_2$ powders in an Ar–N_2 induction plasma, 174

Optical emission
Optical emission study of the laser plasma plume produced during diamondlike carbon thin film preparation, 40
Organosilicon compound
Mass spectroscopy in plasma-enhanced chemical vapor deposition of silicon-oxide films using tetramethoxysilane, 79
Oxide powders
Generation of non-equilibrium plasma at atmospheric pressure and application for chemical process, 117

Photo-radius
Ar torch plasma characteristics and its application to waste treatment, 111
Plasma carbonitriding
Diamond deposition on titanium and iron substrates pretreated in N_2–C_2H_2 plasma, 29
Plasma nitriding
Diamond deposition on titanium and iron substrates pretreated in N_2–C_2H_2 plasma, 29
Plasma process
Total low temperature plasma process for epitaxial growth of compound semiconductors on Si: InSb/Si, 93
Plasma-enhanced chemical vapor deposition
Mass spectroscopy in plasma-enhanced chemical vapor deposition of silicon-oxide films using tetramethoxysilane, 79
Plasma-induced free radicals
Plasma-induced free radicals of polycrystalline dicarbohydrates studied by electron spin resonance, 158
Plasma-induced
Plasma induced degradation of chlorophenols in an aqueous solution, 123
Plasma
Plasma modification of the inner surface of a rubber hose, 165
Pollutants
Plasma induced degradation of chlorophenols in an aqueous solution, 123
Poly-Si wafers
Chamber wall cleaning in a reactive ECR plasma, 148
Polyimide interface film
Polyimide transmitted E-beam excited CF_4 plasma etching, 13
Powdered pigments
Development of silica coating methods for powdered pigments with atmospheric pressure glow plasma, 89
Power dependence
Power dependence of gate oxide damage from electron shading effect in high-density-plasma metal etching, 1
Pretreatment
Diamond deposition on titanium and iron substrates pretreated in N_2–C_2H_2 plasma, 29
Pulsed laser deposition
Optical emission study of the laser plasma plume produced during diamondlike carbon thin film preparation, 40
Spectroscopic study of the $Yba_2Cu_3O_{7-x}$ ablation plasma plume: crossover from the blast to the "drag" regime, 56

Quartz resonator
SiO_2 etching characteristics in DC magnetron plasmas by using an external magnetic field, 6

RF discharge plasma
Production of 1-m size uniform plasma by modified magnetron-typed RF discharge with a subsidiary electrode for resonance, 60
Rubber hose
Plasma modification of the inner surface of a rubber hose, 165

Sapphire substrate
High-rate deposition of $LiNbO_3$ films by thermal plasma spray CVD, 185
Semiconductors
Total low temperature plasma process for epitaxial growth of compound semiconductors on Si: InSb/Si, 93
Sheath potential
Positive bias effects on the growth of diamond at pressures below 100 mTorr, 24
SiO_2 etching
SiO_2 etching characteristics in DC magnetron plasmas by using an external magnetic field, 6
Silica coating methods
Development of silica coating methods for powdered pigments with atmospheric pressure glow plasma, 89
Single phase
Characterization of cementite films prepared by electron-shower-assisted PVD method, 100
Solenoid coil
Preparation of Ti–Al gradient composite films by sputtering, 68
Sputtering
Preparation of Ti–Al gradient composite films by sputtering, 68
Effects of UV light irradiation and excess Zn addition on ZnO:Al film properties in sputtering process, 85
Surface acoustic wave devices
Control of preferential orientation of AlN films prepared by the reactive sputtering method, 152
Surface collisions
Formation and destruction processes of negative ions in a bounded plasma, 128
Synthetic incinerator ashes
Evaporation from synthetic incinerator ashes melted by plasma arc, 105

Tetraethoxysilane
Development of silica coating methods for powdered pigments with atmospheric pressure glow plasma, 89
Thermal plasma spray chemical vapor deposition
High-rate deposition of $LiNbO_3$ films by thermal plasma spray CVD, 185

Thermal plasma
Preparation of AlN fine powder by thermal plasma processing, 189
Thin films
Control of preferential orientation of AlN films prepared by the reactive sputtering method, 152
Titanium aluminide
Preparation of Ti–Al gradient composite films by sputtering, 68
Titanium nitride
TiN/Ti film formation by vacuum arc deposition with droplet shield plate, 73
Torch plasma
Ar torch plasma characteristics and its application to waste treatment, 111
Transmitted E-beam excited plasma
Polyimide transmitted E-beam excited CF_4 plasma etching, 13
Transparent conductive film
Effects of UV light irradiation and excess Zn addition on ZnO:Al film properties in sputtering process, 85

Uniform plasma
Production of 1-m size uniform plasma by modified magnetron-typed RF discharge with a subsidiary electrode for resonance, 60

Vacuum arc deposition
TiN/Ti film formation by vacuum arc deposition with droplet shield plate, 73

Wavenumber spectrum
Effects of antenna wavenumber spectrum and metal end plate on plasma characteristics excited by helicon wave, 139

XPS
XPS structural characterization of hydrogenated amorphous carbon thin films prepared by shielded arc ion plating, 45

$YBa_2Cu_3O_{7-x}$
Spectroscopic study of the $Yba_2Cu_3O_{7-x}$ ablation plasma plume: crossover from the blast to the "drag" regime, 56
ZnO:Al film
Effects of UV light irradiation and excess Zn addition on ZnO:Al film properties in sputtering process, 85
